Week 5

#5.1 Solana wallet Adapter, client side solana

100x devs- cohort-3

Building a dApp >>> wallet

create a react App

add dependencies
    Wallet adaptor ⇒ functionalities

wallet / Dapp / wallet Adpator

DApp → Decentralised App

        Opensea
        magiceden
        fusor
        Jupiter

    Uniswap

        Things to do:
            - Request Airdrop
            - show SOL balances
            - send a Transaction
            - sign a message

Faucet

solfaucet.com
solfaucet.logatech.org

Context.API

Providers

hooks in react

Airdrop
